Full-Stack Web Development Projects

Project 1: Student Course Management System

Objective: Develop a full-stack web application where students can register, log in, enroll in courses, and view their enrolled courses.

Technologies: HTML5; CSS3; Bootstrap 5; JavaScript; React.js; Node.js; Express.js; MongoDB; JWT Authentication; REST API

Features:
• User Registration
• User Login
• JWT Authentication
• Forgot Password (UI)
• Profile Management
• View Available Courses
• Search Courses
• Enroll in Course
• My Courses Dashboard
• Admin Login
• Add Course
• Update Course
• Delete Course
• View Registered Students

Database Collections: Users, Courses, Enrollments

API Endpoints:
POST /register
POST /login
GET /courses
POST /enroll
GET /mycourses
PUT /profile
DELETE /course/:id

Project 2: Online Food Ordering System

Objective: Build a responsive food ordering website with user authentication, menu management, shopping cart, and order tracking.

Technologies: HTML5; CSS3; Bootstrap; JavaScript; React.js; Node.js; Express.js; MongoDB; JWT Authentication

Features:
• Register & Login
• Browse Food Menu
• Search & Filter Food
• Add to Cart
• Place Order
• Order History
• Profile Management
• Admin Login
• Add Food Item
• Update Food Item
• Delete Food Item
• Manage Orders
• View Users

Database Collections: Users, Food Items, Cart, Orders

API Endpoints:
POST /register
POST /login
GET /foods
POST /cart
GET /cart
POST /order
GET /orders
PUT /food/:id
DELETE /food/:id
